

// IN SHORT

Founded in Brussels in 2016, **The Roost** is an emerging band that crafts an atypical musical universe whose energy is drawn from the roots of rock, nu-metal, and stoner.

Very **energetic on stage**, the five offer a repertoire of **powerful and heady tracks** whose heavy and sustained riffs are balanced by melodious vocals.

The band signed a contract for the co-production and distribution of its **first album** with Rox Records / Moonzoo Music (Roland De Greef, Machiavel). **ALICE was released in digital format on 29 March 2020 and in physical format on 25 September 2020.**

"The Roost just released an amazing song called 'Monsters' from their first album, "ALICE". You will absolutely get infected by their high energy and their dark vibes. The lead vocal is so attractive and distinctive and gives the song a beautiful taste. Their lyrical style is amazing and the instrumentals are catchy. Trust me the musical style of this band can't be beaten at all. Give it a listen and tell me what you think below in the comments."

"Your new party soundtrack drops March 27 from Belgium's THE ROOST. Their debut album «Alice» is full throttle rock & roll with an alternative edginess that I really dig

... This is solid indie rock. To call it indie pop would not be far off, but «pop» doesn't give credit to the solid musicianship that is on this album. The vocals are spot on throughout and fit the indie vibe perfectly.

All 10 songs deliver on the promise of the lead single and this album is well worth checking out on March 27. Your new party album has arrived!"

"The Roost's latest release is a full length album that starts off with an intense track about the idealistic couple relationship. It's at the edge of sounding like a stalker wrote a love song for his high school crush but has a couple of filthy hooks that had me... Hooked. 'Leila' is the introduction to this album and a great way of getting to know The Roost. The band makes filthy alternative garage rock that is filled with riffs and rolling drums. The whole album is drenched with this sound and it shows to be a great end product that links all songs together through its dark and moody rock vibe. Even though this single is about the happy topic of love, it sounds rather dark and gives the feeling of a tough break up, but "'Leila' is the one, the one you wish for."

"... Tu avais déjà croisé la route de Matthieu Meunier (chant)/ Jérémy De Bels (gt)/ Laurent Cenatiempo (gt, backings)/ Jeff Pessi (bass) et Pierre-Yves Darquenne (drums) en 2017, c'était au Zik-Zak, le Marquee du Brabant Wallon.

L'énergie du groupe pratiquant un stoner/nu-metal/post grunge virulent avait séduit l'assistance. ... Avec 'Alice', The Roost signe un premier album louable et accompli qui ne demande qu'à être joué sur scène"
